Detailed Action

Claims 1-25 have been presented for examination.

Claims 1-5 and 7-17 have been allowed.

Claims 18-25 have been rejected.

Claim 6 has been objected to.

Objections

Claim **6** recites, "The method of claim **7**, wherein said command execution mode is selected from the group consisting of normal mode, expedite mode, immediate mode, and forced mode." Examiner suggests changing 7 to 5.

Claim **22** recites, "The computer program product of claim **22**, wherein said command execution mode is selected from the group consisting of normal mode, expedite mode, immediate mode, and forced mode." Examiner suggests changing 22 to 21.

Examiner objects to the drawing especially to figure 1, and figure 2. Pages 4-6 of the detailed description describe all the items of figure 1 except 137, 139, 147, 149, 150, 152, and 160. Examiner strongly suggests including the description of the items listed above within the description of figure 1. In addition, page 7 of the detailed description describes all the items of figure 2 except 213, 223, 233, 243, 253, 263, 273, 283, 215, 225, 235, 245, 255, 265, 275, 285, 296, and 298. Examiner strongly suggests including the description of the items listed above within the description of figure 2.

Claim Rejections - 35 USC § 101

35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claims 18-25 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter.

The language of the claims raise a question as to whether the claims are directed merely to an abstract idea that would not result in a practical application producing a concrete, useful, and tangible result to form the basis of statutory subject matter under 35 U.S.C. 101.

In summary, claims 18-25 recite "A computer program product usable with a programmable computer processor having computer readable program code embodied therein for" The recited invention is computer software per se. A computer program is merely a set of instructions capable of being executed by a computer. The computer program itself is not a statutory process in that it does not include the computer readable medium needed to realize the functionality of the computer program. Thus as currently recited, claims 18-25 are directed to an abstract idea that does not produce a concrete, useful and tangible result.

Examiner strongly suggests the use of "a computer readable medium" language within claims 18-25, and also to put item 152 [computer program product] of figure 1 within item 150 [computer usable medium], and similarly to put item 162 within item 160.
